Professional Summary

An experienced Software Developer with in-depth expertise in Full Stack Web Development. Proficient in building scalable and efficient web applications, from Backend development using Node.js and SQL/NoSQL databases, to implementing responsive and interactive user interfaces with React and Tailwind CSS. Possesses a proven track record in leading technical teams (Tech Leader), collaborating in Agile environments, and a strong passion for learning new technologies and contributing to innovative projects.

Work Experience

PT Siloam International Hospitals Tbk (Siloam Hospitals) Full Stack Developer - Developing and maintaining the Hospital Information System (HOPE) to integrate patient Electronic Medical Records (EMR) and daily hospital operations. - Building interactive and responsive user interfaces utilizing React and TypeScript. - Designing and managing backend architecture using Node.js and SQL to ensure high scalability and medical data security.	June 2024 - Present (1 year 11 months)
PT Nusantara Duta Solusindo Full Stack Developer (as vendor) - Working as a vendor to develop healthcare systems for key clients, ensuring on-time project delivery with high-quality code standards. - Collaborating closely with the client's internal team to implement new healthcare features and resolve software bugs.	June 2024 - Present (1 year 11 months)
PT Blend Media Kreasi Sitecore Developer - Developed and managed Content Management System (CMS) platforms utilizing Sitecore technology. - Designed and implemented integrated Form Dashboard features for comprehensive data management and tracking. - Optimized website performance and ensured seamless system integrations tailored to the client's business requirements.	March 2023 - June 2024 (1 year 3 months)
PT Solusi Inovasi Pesat Middle Fullstack Developer - Architected and developed an integrated Marketing & Sales application using Laravel and Vue.js (Quasar). - Engineered end-to-end productivity ERP solutions (Mitrahino Productivity) using Express.js and Quasar. - Designed relational database architectures and developed RESTful APIs to facilitate efficient system communication across platforms.	March 2022 - March 2023 (1 year)
PT. Modernesia Teknologi Informatika Software Developer / Backend Developer - Designed and developed robust backend services utilizing Express.js for various management applications. - Built public infrastructure and operational management systems, including transportation management (Tron, Teman Bus) and parking management (JakParkir). - Implemented third-party API integrations and ensured high availability for large-scale systems.	March 2019 - March 2022 (3 years)
Berbagi Kerja ID PKL Berbagi Kerja - Participated in the full-cycle development of the "Berbagi Kerja" startup application, from UI/UX design to implementation. - Developed an interactive landing page and contributed to the Android mobile application. - Contributed to the backend architecture using Express.js and developed an internal finance module.	January 2021 - June 2021 (5 months)
Aquamatika Private Math Tutor & Home Math Teacher - Provided comprehensive private math tutoring sessions to improve students' understanding and academic scores. - Evaluated and customized teaching methods based on individual student needs, learning psychology, and skill levels.	August 2017 - May 2020 (2 years 9 months)
LPM Quantumatika Ciampea Tentor Matematika SD/SMP/SMA - Taught mathematics subjects to a diverse range of students from elementary to high school levels. - Provided training and coaching to fellow tutors as an Instructor Tentor. - Co-managed the institution's operations, including teaching schedules, financial management, and marketing strategies.	June 2017 - October 2018 (1 year 4 months)

Education

UIN Syarif Hidayatullah Jakarta Informatics Engineering Undergraduate coursework focused on Software Engineering, Network Engineering, Artificial Intelligence, Machine Learning, and Robotic.	2018 - 2022	SMAN 1 Ciampea Science (MIPA) Focused on exact subjects such as mathematics, physics, chemistry, and biology.	2014 - 2017
--	--------------------	---	--------------------

Skills

HTML & CSS	JavaScript	Typescript	Express	Quasar
Sequelize	Laravel	Codeigniter	Flutter	Java
Git	C++	Python Lang	MongoDB	CI/CD
Docker	Docker Compose	Kubernetes	Redis	PostgresSQL
MySQL	Microservices	Golang	PHP	Web Security

Nginx	Agile Development	Tailwind CSS	React	VueJs
Restful	C#	Sitecore	Solr	Monolithic Apps
Machine Learning	MochaJS & JUnit	Rust	JetBrains IDEs	Google Gemini (AI)
Antigravity (Python)	Asp.Net	SQL Server	DBeaver & DBSchema	IIS
Windows PowerShell	WebStorm & Goland	DataGrip & Rider		

Featured Projects

Geonera (Aplikasi Signal Forex) 2025 - Present Personal project: A Forex signal application providing real-time trading signals, market analysis, and user notifications. Technologies: Node.js, React Native, Python (Silakan disesuaikan) Key features: Real-time Signals, Market Analysis, Push Notifications	HOPE (Sistem Informasi Rumah Sakit) 2024 - Present Hospital Information System for managing hospital operations, electronic medical records (EMR), and patient data integrations. Technologies: Node.js, React, TypeScript, SQL (Silakan disesuaikan) Key features: Patient Management, Electronic Medical Records, Hospital Operations
Mitrahino (Productivity) 2022 Providing PT Mirahino with Productivity complete solution, as part of MetaMine Integrated ERP System. Technologies: Express (NodeJS) & Quasar (Vuejs) Key features: Productivity ERP System	Marketing & Sales App 2022 Marketing & Sales System prepared for PT BMBBD (Binuang Mitra Bersama Blok Dua) in the integration of every Sales & Marketing business process. Technologies: Laravel (PHP) & Quasar (Vuejs) Key features: Sales & Marketing Integration
Sosial Media Analytic 2021 Social Media Analytics Dashboard Application Technologies: Django Key features: Analytics Dashboard	Insurance Broking System (IBS) 2021 Microservices Broking System Technologies: Spring Key features: Microservices Architecture
Berbagi Kerja 2021 Startup application sharing work with lecturers Technologies: ExpressJS Key features: Work Sharing	JakParkir 2020 - 2021 Parking Management Application in Jakarta Technologies: ExpressJS Key features: Parking Management
Prediksi Mata Uang Cryptocurrency 2020 Digital currency prediction Big Data project Technologies: Python Key features: Data Prediction	Tron 2020 Transportation Management Application in Bandung area Technologies: ExpressJS Key features: Transportation Management
PT. Kopi Sans 2018 Desktop application for managing coffee entrepreneurs (user management, payroll, barcode scanner data input, Ireport). Technologies: Java Key features: Desktop GUI, Barcode Scanner, Report Printing	Akutansi Aquamatika 2017 Desktop application for financial management, teacher management, and employee management. Technologies: Visual Basic Application Key features: Financial & Management System
