Professional Summary

An accomplished Senior Software Engineer and Quantitative Systems Developer with a proven track record of designing high-performance system architectures and leading complex engineering initiatives. While deeply experienced in modern Full-Stack development (Node.js, React), my core expertise extends into system-level programming using Rust and Python to optimize algorithmic performance. I excel in architecting robust data pipelines and time-series data management systems tailored for quantitative analysis. Recognized for bridging the gap between sophisticated backend engineering and scalable microservices, I consistently deliver measurable impacts—optimizing system throughput, reducing latency, and building highly scalable solutions that drive business growth.

Work Experience

PT Siloam International Hospitals Tbk (Siloam Hospitals)

June 2024 - Present (1 year 11 months)

Full Stack Developer

- Developed and maintained the Hospital Information System (HOPE) utilizing React and TypeScript, accelerating daily hospital operations and EMR integrations by [X]%.
- Engineered a high-performance backend architecture using Node.js and SQL to seamlessly manage patient records, reducing data retrieval latency by [X]%.
- Designed interactive user interfaces that improved medical staff productivity and overall user satisfaction by [X]%.

PT Nusantara Duta Solusindo

June 2024 - Present (1 year 11 months)

Full Stack Developer (as vendor)

- Delivered critical healthcare systems for key clients as a vendor, achieving a [X]% improvement in project delivery timelines with high-quality code standards.
- Collaborated seamlessly with client internal teams to deploy new healthcare features and resolve complex software bugs, decreasing system downtime by [X]%.

PT Blend Media Kreasi

March 2023 - June 2024 (1 year 3 months)

Sitecore Developer

- Developed and managed enterprise-grade Content Management System (CMS) platforms using Sitecore, increasing content deployment speed by [X]%.
- Architected and implemented integrated Form Dashboard features, boosting data tracking efficiency and management accuracy by [X]%.
- Optimized website performance and streamlined system integrations, which improved overall page load speeds by [X]%.

PT Solusi Inovasi Pesat

March 2022 - March 2023 (1 year)

Middle Fullstack Developer

- Architected and deployed an integrated Marketing & Sales application utilizing Laravel and Vue.js (Quasar), accelerating sales tracking processes by [X]%.
- Engineered the end-to-end Mitrahino Productivity ERP solution using Express.js and Quasar, resulting in a [X]% increase in client operational productivity.
- Designed scalable relational database architectures and RESTful APIs, improving system communication efficiency across platforms by [X]%.

PT. Modernesia Teknologi Informatika

March 2019 - March 2022 (3 years)

Software Developer / Backend Developer

- Designed and developed robust backend services for massive public infrastructure systems (Tron, Teman Bus, JakParkir) using Express.js, handling over [Y] million daily transactions.
- Implemented high-availability API integrations and optimized operational management platforms, reducing system latency by [X]% under peak loads.

Berbagi Kerja ID

January 2021 - June 2021 (5 months)

PKL Berbagi Kerja

- Spearheaded the full-cycle development of the "Berbagi Kerja" startup platform from UI/UX design to implementation, increasing user acquisition by [X]%.
- Engineered scalable backend architecture and an internal finance module using Express.js, improving transaction processing speed by [X]%.

Aquamatika

August 2017 - May 2020 (2 years 9 months)

Private Math Tutor & Home Math Teacher

- Delivered comprehensive mathematics training programs, improving student academic scores and conceptual understanding by [X]%.
- Customized and evaluated pedagogical methods tailored to individual learning capabilities, resulting in a [X]% increase in student satisfaction.

LPM Quantumatika Ciampea

June 2017 - October 2018 (1 year 4 months)

Tentor Matematika SD/SMP/SMA

- Taught mathematics subjects to a diverse range of students from elementary to high school levels, consistently raising class averages by [X]%.
- Provided advanced training and coaching to fellow tutors as an Instructor Tentor, enhancing overall teaching quality by [X]%.
- Co-managed institution operations, including teaching schedules, financial management, and marketing strategies, which increased student enrollment by [X]%.

Education

UIN Syarif Hidayatullah Jakarta

2018 - 2022

Informatics Engineering

Undergraduate coursework focused on Software Engineering, Network Engineering, Artificial Intelligence, Machine Learning, and Robotic.

SMAN 1 Ciampea

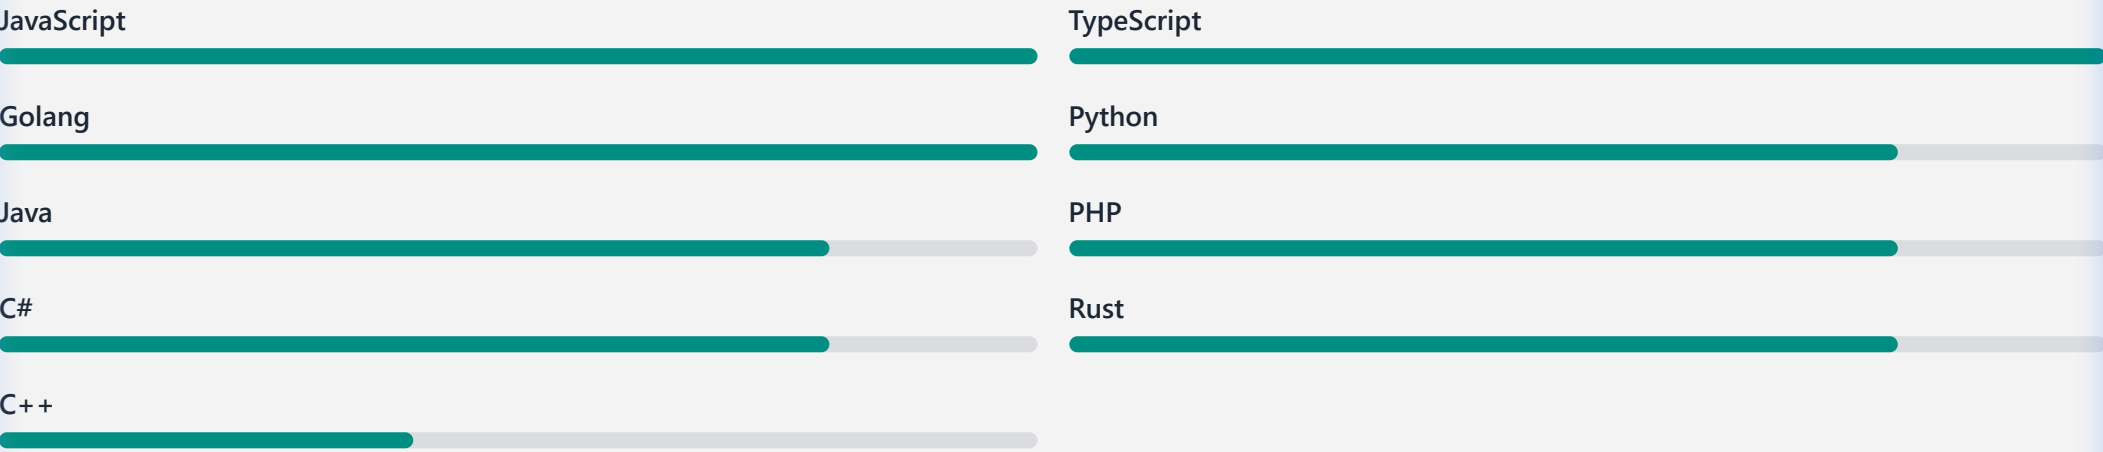

2014 - 2017

Science (MIPA)

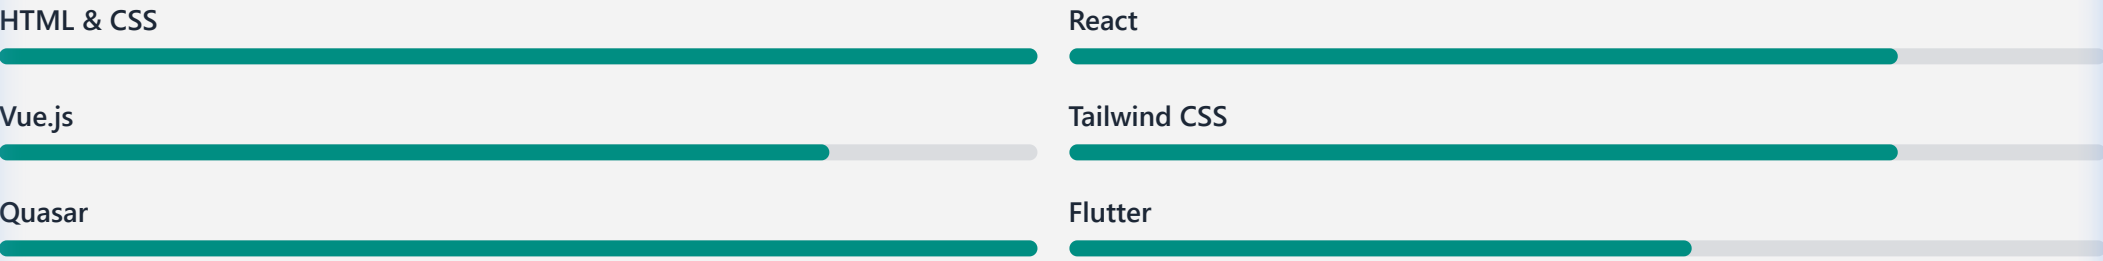

Focused on exact subjects such as mathematics, physics, chemistry, and biology.

Skills

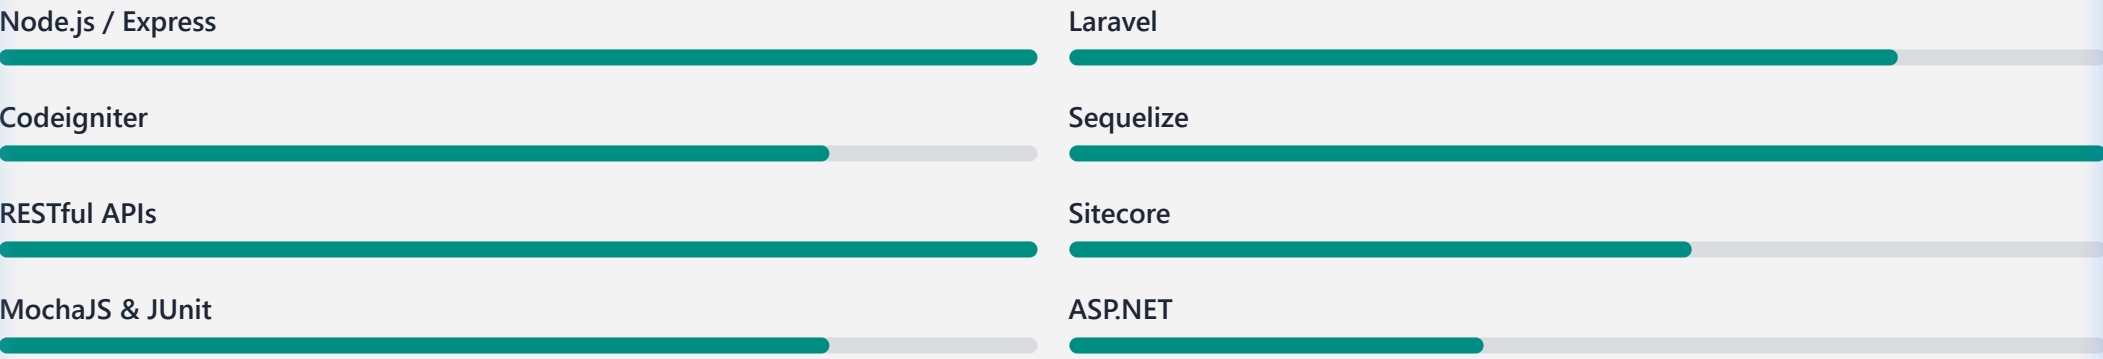

Languages

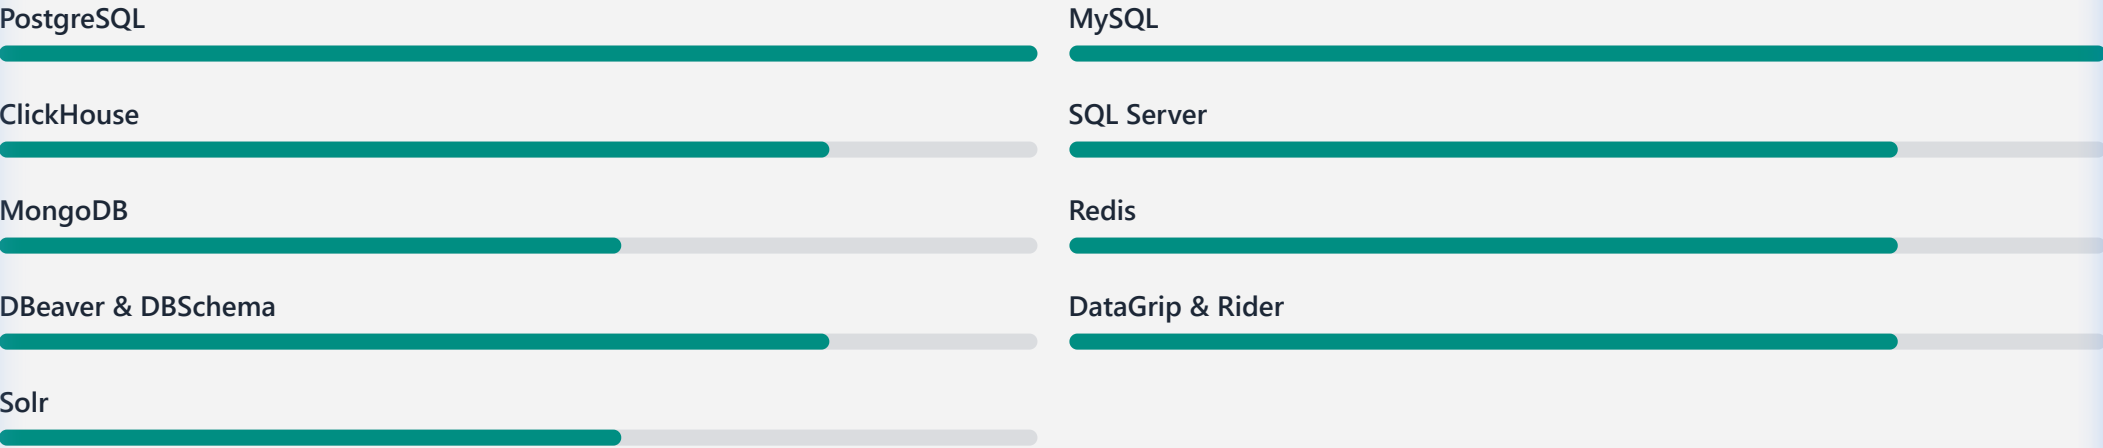

Frontend

Backend & Microservices

Databases & Data Engineering

System Architecture & AI

Microservices	High-Performance Computing
Docker & Compose	Kubernetes
CI/CD Pipelines	Web Security
Nginx	Agile Development
Machine Learning	Google Gemini (AI)
Antigravity (Python)	Monolithic Apps
IIS	Windows PowerShell
WebStorm & Goland	JetBrains IDEs

Featured Projects

Geonera (Strategy Discovery Machine)

2025 - Present

Engineered the Strategy Discovery Machine (ESSE) utilizing Bayesian Optimization and Genetic Programming within an advanced walk-forward engine to systematically identify robust quantitative strategies. Spearheaded the system migration from Python to Rust to maximize algorithmic performance. Architected complex Data Definition Language (DDL) schemas using ClickHouse to efficiently manage and query massive datasets of candle and tick data.

Technologies: Rust, Python, ClickHouse

Key features: Top-N Strategy Selection Engine, Strategy Export Layer, Walk-Forward Validation

HOPE (Sistem Informasi Rumah Sakit)

2024 - Present

Hospital Information System for managing hospital operations, electronic medical records (EMR), and patient data integrations.

Technologies: Node.js, React, TypeScript, SQL

Key features: Patient Management, Electronic Medical Records, Hospital Operations

Mitrahino (Productivity)

2022

Providing PT Mirahino with Productivity complete solution, as part of MetaMine Integrated ERP System.

Technologies: Express (NodeJS) & Quasar (Vuejs)

Key features: Productivity ERP System

Marketing & Sales App

2022

Marketing & Sales System prepared for PT BMBBD (Binuang Mitra Bersama Blok Dua) in the integration of every Sales & Marketing business process.

Technologies: Laravel (PHP) & Quasar (Vuejs)

Key features: Sales & Marketing Integration

Sosial Media Analytic

2021

Social Media Analytics Dashboard Application

Technologies: Django

Key features: Analytics Dashboard

Insurance Broking System (IBS)

2021

Microservices Broking System

Technologies: Spring

Key features: Microservices Architecture

Berbagi Kerja

2021

Startup application sharing work with lecturers

Technologies: ExpressJS

Key features: Work Sharing

JakParkir

2020 - 2021

Parking Management Application in Jakarta

Technologies: ExpressJS

Key features: Parking Management

Prediksi Mata Uang Cryptocurrency

2020

Digital currency prediction Big Data project

Technologies: Python

Key features: Data Prediction

Tron

2020

Transportation Management Application in Bandung area

Technologies: ExpressJS

Key features: Transportation Management

PT. Kopi Sans

2018

Desktop application for managing coffee entrepreneurs (user management, payroll, barcode scanner data input, lreport).

Technologies: Java

Key features: Desktop GUI, Barcode Scanner, Report Printing

Akutansi Aquamatika

2017

Desktop application for financial management, teacher management, and employee management.

Technologies: Visual Basic Application

Key features: Financial & Management System

Certifications

- Sharing Session Embedded System and IOT *(2022)*
- Introduction to Data Science with Python *(2021)*
- Introduction to Data Science With R *(2021)*
- HCIA-Routing & Switching International *(2021)*
- Introduction Cyber Security and Data Protection *(2021)*
- Introduction to Programming using Python *(2020)*
- R Fundamental For Data Science *(2020)*
- Sertifikat Workshop Tetap Profit Selama Covid *(2020)*
- MTCNA *(2019)*
- Diksarkop XXXII *(2019)*
- Training Python For Data Science By Rumah Koding *(2019)*
- Microsoft Technology Associate Software Development Fundamentals *(2018)*
- Pelatihan Aplikasi Windows dan Design Grafis *(2017)*
- Matematika RIA IPB *(2016)*
